Forschungsinstitut Bildung Digital

## Job advertisement

Postdoc (m/f/x) in

„Computer Science with focus on Innovative Learning Technologies“

The Forschungsinstitut Bildung Digital (FoBiD) (equivalent to: Research Institute for Digital Education) is an interdisciplinary institution that conducts innovative research projects in the context of education and digitization. We are a young, dynamic and motivated team of computer scientists and didactics experts from different disciplines. In our projects, we develop training and further education courses for schools, universities and industry. Our focus is always on applied research with practical relevance.

### Job requirements and responsibilities:

- Implementation of specific teaching and learning scenarios
- Design and development of individual education solutions
- Collaboration in the acquisition and implementation of national and international research and development projects (e.g. Federal Ministry of Education and Research) on innovative learning technologies

### Academic qualifications:

- Studies in computer science, business informatics, media informatics or a related subject with a significant amount of computer science
- Completed doctoral degree in computer science
- Experience with modern web technologies, especially interactive technologies (e.g. Virtual and Augmented Reality, Gesture Recognition, Multimodal Interactions, etc.)
- Ability to work in a team
- Ability to work independently and methodically
- Willingness to familiarize with new responsibilities

### What we offer:

- Collaboration in interdisciplinary research projects at the interface of computer science and didactics
- A broad network of excellent contacts in science and industry
- Excellent equipment
- An innovative, agile and professional working environment at a unique research institute in Germany

### Contract and salary:

100% of standard working time, salary in accordance with the German TV-L (E-13) salary scale / pay grade: 3 years (extension possible)
